

GISELA BENITEZ

Frontend-focused Full Stack Engineer

Valencia, Spain | gisela.m.benitez@gmail.com | linkedin.com/in/gisela-benitez

PROFESSIONAL PROFILE

Frontend-focused Full Stack Engineer with hands-on experience building production web applications using React and TypeScript. Committed to code quality, usability, and maintainability, with a collaborative approach to working within multidisciplinary teams.

EXPERIENCE

iBOOD.com - Amsterdam, Netherlands

Full Stack Developer - Frontend Focus *Jun 2022 - Dec 2025*

- Developed and maintained full stack features with a strong frontend focus for a large-scale e-commerce platform using React and TypeScript.
- Delivered features in a continuous delivery environment with automated pipelines running through to production.
- Collaborated within a lightweight Agile setup, participating in daily standups and ongoing team communication.
- Ensured code quality and reliability through automated pipelines, SonarQube validations, and test coverage controls.
- Integrated frontend features with existing backend and ERP systems built in Java, Python, and Odoo.
- Contributed incremental improvements while maintaining stability in a critical production environment.

LeArSoft SRL - Buenos Aires, Argentina

Front End Developer - Equifax Project *Feb 2020 - Mar 2022*

- Participated in the front-end re-engineering of an enterprise-level information system for Equifax using Angular (8-11) and TypeScript.
- Implemented unit tests with Jasmine and Karma, improving code reliability and maintainability.
- Collaborated with backend teams on API integration built with Spring Boot and WebFlux.
- Took part in code reviews and technical discussions focused on shared standards and code quality.

Full Stack Developer - Buquebus Project *Apr 2017 - Feb 2020*

- Built features for a ticket sales system, working across both frontend and backend.
- Implemented features using JavaScript, jQuery, and Java 8 within an existing codebase.
- Collaborated on database migrations from SQL Server to Oracle.
- Gained experience working with legacy systems and version control workflows during the transition from SVN to GitHub.

QA Analyst - Veraz Project *Sep 2016 - Apr 2017*

- Executed functional and regression tests for financial sector applications.
- Supported test automation using SoapUI, JMeter, and Selenium.
- Worked closely with developers to report, track, and validate bug fixes.

IBM Argentina SRL - Buenos Aires, Argentina

Local Service Administrator - HR *Nov 2011 - Sep 2016*

- Supported the Learning & Development team by coordinating in-person courses and internal training programs.
- Managed training logistics including planning, communication with participants, and coordination with instructors.
- Used internal systems to track attendance, course completion, and training records.
- Collaborated with HR stakeholders to ensure the successful execution of training initiatives.
